How to help If you have a spinning wheel and a way to apply the spinning wheel effect to the Circle Spinner template, you can spin any page any number of times. You can help, for free, any user of the Circle Spinner template, by spinning a page manually (with a modern web browser such as Chrome, Firefox, or Safari) so that the Circle Spinner template displays on the page as a spinning wheel. Please note that only a mobile or handheld device will work as a spinning wheel, such as an iPhone, iPad, and the like. If you choose to participate in this program, you will be contacted when a new version of the Circle Spinner template is available. You will be provided with either a link to the documents or the documents themselves (for a private or educational setting). You have to be registered with Plexiglass Views, Inc., to spin a page using this program. All participants are to spin the same page (not a new spin of a different page, but the same page) and add the documentation you receive into the content area of the new Circle Spinner template. This is so that we can see how the different results compare in terms of design. Please be sure you read and understand all instructions before joining.
