positive bacteria to different alloys: the
influence of surface topography and
roughness. The aim of this study was to assess
the influence of surface topography and
roughness on the adhesion of Gram-positive
bacteria to dental alloys. The two main factors
studied were: 1) a rough, microtextured
surface, which was machined using a diamond
lapping machine and 2) a rough,
microtextured surface and a smooth surface,
which was etched using a modified Rocatec
technique. Three different alloys with different
compositions were used for this study:
magnesium alloy Magalloy, which was air-

abraded, Pd-Ag-based alloy Hastelloy and an oxide-free, Pd-Ag-based alloy (BIO-NAVARAN-P).

sellers Guardian best sellers are books which
have been published by Guardian Media Group
and which have received best seller status

from The Bookseller magazine. Book awards are often based on the work of sales and marketing, rather than on the quality or persuasiveness of the work itself. The list is not comprehensive and there are those who believe that it is more accurate to refer to "Guardian long-standing best sellers". The best sellers list first appeared in the Bookseller in 1955. Until the mid-1990s, there were no national or international best seller lists or other methodologies used to calculate their rankings. It is no longer updated; however, some of the titles that previously appeared on the list appear on the Imprint list.
