Forum topic that might have something to do with this one: Minister Simon Bridges has held talks with the Norwegian government about KiwiRail staff redundancies as the rail company plans for the New Zealand economy to shift from coal to gas. Photo: RNZ / Claire Eastham-Farrelly KiwiRail will announce another 10-20 staff job cuts later this year, the head of the company, Simon Lusk, said at the launch of the Rail Future Project. The rail line between Palmerston North and Wellington is a key passenger route and Mr Bridges said he would seek a meeting in Oslo to discuss the impact. Mr Lusk said the rail line could handle a coal train carrying 1.5 million tonnes of coal. But the company said the Palmy tunnel, which will be between two main coal sources in Rotorua and Tiwai Point, is due to be turned into a rail freight route. That means the rail line could not carry coal. "Ultimately, in New Zealand that may be about 8 to 9 million tonnes of coal a year if they decide to go down that route," Mr Lusk said. "That would be the transport for New Zealand's coal if that was happening, so we will be looking at the routes and how can we make sure that it is just freight that is going through and not trains carrying passengers - and there's not a lot of freight that travels between Palmerston North and Wellington at the moment." Mr Bridges said the shift to gas, electricity and nuclear would mean coal would drop out of New Zealand's economy. "I'm pleased to say that the BPC plan has given a direction which will lead to that, so in the long run New Zealand will not be relying on coal anymore," he said. Mr Bridges, the MP for W

Pasopouli, Thessaloniki Pasopouli (), is a neighborhood of Thessaloniki, Greece. Until 1916, it was called "Garini" after the local Patron Saint, Thesaurus, whose grave, under the nearby Archbishopric of Thessaloniki, is at the origin of the center of the neighborhood. Both names were altered to take the first letter of the name of patron Saint, and today it is called after Pasopouli. What's new in Battle Girls - Dakimakuras:

zipped past store shelves like an assassin on wheels. BattleTech 1 sped along dutifully, one of a string of mech related novels that have come out this year. This combination of familiar fragments and disappointment sparked my interest; I was both happy to see my favorite franchise back, as well as eager to see what publishers would call Scott Weber's foray into the "evolving" "postmodern" "future" genre. After all, BattleTech isn't just a tech sci-fi romp, it is a multi-media work of art, and Weber's ability as a storyteller and writer may shine his rather mundane version to new heights. BattleTech 1 does just this, and right now, nobody is better at this than him. There's a lot of ground to cover in this first novel, with most attention falling on the tale of the lieutenant Roland Skare. Yes, Weber incorporated the events of "Way of the World" into the novel, but many chapters stand alone (and, in a manner of speaking, could be removed and inserted into the main story). In this sense, many of the characters will be mentioned and glossed over, while some that are perhaps more important will be discussed. Details will be left for the next two novels (which are, of course, heavily influenced by "The Way of the World"), and some characters from "Way of the World" should be mentioned here as well, including the face of the mechanical spider Dant, my personal favorite. The novel kicks off with the Scout Loraan, a modified UM-Dao infantryman, being ambushed by a force of mech soldiers. Having been warned of the danger, he incapacitates them, and is forced to flee for his life. After knocking out two bandits while scavenging, he finds a young girl crying for her mother. As it turns out, the mother just committed suicide, and thus, two new characters are introduced. Over the course of the next chapters, we follow Loraan as he, along with other Scout bands, destroy several enemy forces. It's a hark back to the old model, with a single player making his own series of

decisions that shape the story. The larger, more significant goal is spreading the word that the Mech War is over, stopping the presence of the Antillans. The Scout bands spread out, and when they return
