Elephantasy is a small exploratory puzzle-platforming game where you play as a tiny Elephant trying to get back to their home. Story: You've met Snorri the Wizard, and he's given you a small seed that's the key to finding your home again. But in a curious twist, you're transported to a small world, with Snorri in tow, in the form of an elephant! Accessibility: Elephantasy is available in both Hard and Easy versions. Both versions of the game use the same worlds and puzzles, and offer the same difficulties for those who prefer more of a challenge. The developer of the game has released an arcade version of Elephantasy in its "Arcade Mode", playable on its website as well as Steam. Reception In a review for, Danoth said "The game's art direction, voice acting, and music are great on their own, but it's the brilliant tone that the game takes with its story that make it so much fun. The Elephant, an adorable, silly, and yet somehow strangely serious game, is a must play for all ages, and even the most seasoned gamers will find themselves soaking up the unusual art style, charming story, and lighthearted tone.". Show that $f(x) \leq x$ for all $x \in \mathbb{R}$. I'm trying to solve this question: Let f be a continuous function such that $f(x) \in [0, 1]$ for all x in some interval. Show that $f(x) \leq x$ for all $x \in \mathbb{R}$. Intuitively, this seems true, but I couldn't quite make it rigorous enough to prove it. I started by saying that since $f(x) \in [0,1]$ then we can choose γ_1 and $\gamma_$

Elsie: The Legendary Fairy King is based on a sweet fable from Japanese folklore. Elsie is a fairy who, in order to break a curse imposed by her stepmother, changed herself into a human. With her flowing red hair and beautiful smile, she is the perfect princess. The only problem? She is cursed to have eyes that can see the sun, an unusual trait for a human, resulting in summer never ending. The story revolves around Elsie as she enters the world of humanity and learns of the power of human muscles. As an anthropomorphic anthropomorphous creature, the first thing she learns is the definition of 'weapon'. This paves way to a conflict between the gods of humanity, the Fairies of Elsie's hometown, and the Goddess of Freedom. The game also features Elsie's boyfriend, Sakurako, a young man who hopes to save Elsie and unveil the truth about the curse placed on her. The first chapter of the game is free for anyone to play and there are also several other playable characters, including Elsie's mother and her best friend Go. Elsie's game is now in Steam Greenlight, and will be available for PC, Mac, Linux and other platforms in 2017. What's New: * New character, available when playing the final version. * UI improvements. * Free play mode (no longer requires PSN) * Brand new final theme for Elsie. Don't hesitate to give us feedback and if you have any bug report, or find any problem in the game, tell us about it on Twitter or Facebook. We look forward to hearing from you all! Is it possible to go through this data set and replace the missing value with a 0 in the case where the missing value appears in less than 50% of the available cases? I did some research and I've seen that it's possible to replace missing values on a single column by using pandas.melt(). In my experience, I haven't found a strategy to impute all variables from a data set using a specific data frame structure. A: yes, you can do that by using pandas.melt and then condition based dropna import pandas as pd #sample data set df = pd.DataFrame({'col1':['a', 'b', 'c', 'd', 'e', 'f', 'g', 'h'],'col2':['l', 'o','m', 'p', 'z', 'c', 'f','g'],'col3':[1,2,3,np.nan,4,5,np.nan,6]}) #replace missing values with 0 df = df.loc[df.col
