Sokodice is inspired by the classic crate-pushing puzzle game, Sokoban, and is in turn a modern evolution of that game. You are given 100+ challenging levels to navigate, where you'll encounter many environmental challenges, obstacles, and a variety of die abilities. Although we've evolved from the original Sokoban, Sokodice isn't a clone, and our tile design is anything but identical to the original. Each level is a standard 6x6 grid, however, some levels have tiles replaced by cups, potions, tureens, bags, and other items, that can be used to solve puzzles. Each world and level has it's own goals, and requires you to utilize the abilities of your dice to reach them. Play through the 100+ levels and 1 epic bonus level. Play Classic Sokoban and get an extra free level that can't be purchased. In Deckboxers, the player starts with a hand of cards and a deck of cards. The goal is to have the highest price. The player can buy cards with "dollars" or by swapping cards in their hand with cards from their deck, thus altering their hand and in turn their value. The player can be aided in gaining the highest price by "bonuses". The rules are based on rotational strategy and the game contains four difficulty levels, with each easier level having multiple decks. There are seven stars to aim for, each representing one of the seven days of the week. Five stars are required to unlock each of the bonus levels. There is also the option for the player to upload a deck of his or her own, allowing the player to modify the rules and rules of the game as well. The player is allowed to create 12 decks. The player can select a difficulty level as well as a player rank. The game is easy to pick up and allows the player to adjust difficulty by
