Burnout Paradise The Ultimate Box Repack Mr DJ RePack

racers who already own burnout paradise on the playstation 3 can upgrade to the ultimate box version for free. the ultimate box contains a whole host of neat new features, including an hour of free post-game play, an extra hour of challenge and six new cars (including the impressive sardinian jump truck). all of the above is available to you as from october 13 this year. to get started you'll need to go to the game's game page . i have confirmed that the game has a new option in the options tab titled targeted performance which when enabled, will automatically set the maximum memory/power setting to improve framerate. this is a compromise between a good framerate and high temperatures. to enable this you will have to go to the customisation tab then to set cpu / cpu cooler to the lowest setting. "targeted performance" is a useful feature to have on. the game seems to run faster on my pc than it does in the demo. it is very good, showing that the engine is solid. burnout paradise is a riot, with fantastic graphics and ridiculous cars. the controls are well thought out and feel natural, with an imprecise handling model and the speed of the vehicle. the physics engine definitely adds an element of fluidity to the driving. you control the action from a first person perspective, going into a cover mechanic when guns start to go off. ai opponents are real, and can be frustrating, but they are outweighed by a brilliant and hilarious sense of humor. we've got a feeling this is gonna be one of criterions most dynamic titles, when its released on ps4 and ps3. the game will feature over 50 virtual cars and a brand new authentic, open world environment. check out the official description below and we're looking forward to the original.
